

11x, 12x Modular Panels

The Modular control panels are a DALI-compatible range of user interfaces that allow basic adjustments to the lighting system.

The range includes pushbutton, rotary and slider controls in a range of panel finishes. Each module is fitted with an indicator LED and an infrared receiver is included which gives the option of remote operation using a Helvar infrared remote control.

The remote control also allows additional control of the system's functions and can be used as a programming device on simple systems.

Key Features

- Out-of-box operation, supplied preprogrammed
- Easily reconfigured and fully programmable
- Designed to fit both DIN and UK standard back boxes
- Double-gang version can take three independent modules
