

# Freedom Sense Installation Guide

The Freedom Sense is a small luminaire-based sensor that combines a light sensor for constant light control and a passive infrared movement detector.

Similarly as 5630 ActiveAhead Sense, this sensor works as a part of the Helvar's ActiveAhead wireless self-learning lighting control solution.

## Features

Light Sensor - For constant light functions

*\*Max recommended height 3 m*

Presence Detector - Passive infrared (PIR)

*\*Max recommended height 4 m*

## Connection

Connector side/rear view

**Note:** Ensure each connector securely ‘clicks’ into place when plugged in correctly.

There are two set up scenarios:

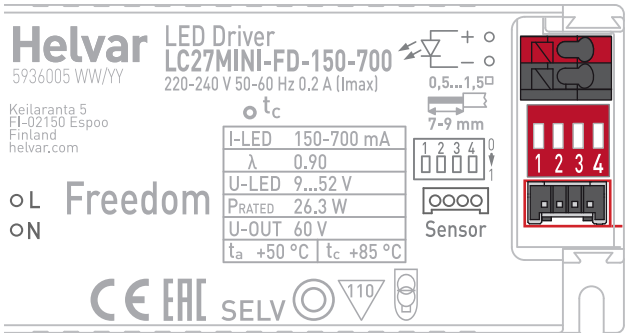

### Case 1 - Connection to Freedom driver and separate Freedom Node

Freedom Node

### Case 2 - Connection to Freedom driver with integrated radio unit (e.g. LC27MINI-FD-150-700, LL4-CV-FD)

## Mounting

The following figures show two of several possible methods of mounting the Freedom Sense in a luminaire. In both cases, the sensor is mounted to 22 swg (0.7 mm) sheet metal:

- Option 1 uses the mounting features on the rear of the sensor.
- Option 2 uses the mounting features on the long sides of the sensor.

The mounting features can be used to provide customised mounting solutions.

The examples shown are for guidance only. Mounting brackets are not supplied. All dimensions are in millimetres.
